

PLSQL Exercise_1

Schema created :

```
CREATE TABLE Customers ( CustomerID NUMBER PRIMARY KEY, Name VARCHAR2(100),  
DOB DATE, Balance NUMBER, LastModified DATE );
```

```
INSERT INTO Customers (CustomerID, Name, DOB, Balance, LastModified) VALUES (1, 'John  
Doe', TO_DATE('1985-05-15', 'YYYY-MM-DD'), 1000, SYSDATE);
```

Scenario 1 : Age above 60 gets 1% discount

```
BEGIN  
  FOR cust IN (  
    SELECT CustomerID, DOB, InterestRate  
    FROM Customers  
  ) LOOP  
    IF TRUNC(MONTHS_BETWEEN(SYSDATE, cust.DOB) / 12) > 60 THEN  
      UPDATE Customers  
      SET InterestRate = InterestRate - 1,  
          LastModified = SYSDATE  
      WHERE CustomerID = cust.CustomerID;  
    END IF;  
  END LOOP;  
  
  COMMIT;  
END;  
/
```

Scenario 2: Balance over 10000 gets VIP flag

```
BEGIN  
  FOR cust IN (  
    SELECT CustomerID, Balance  
    FROM Customers  
  ) LOOP  
    IF cust.Balance > 10000 THEN  
      UPDATE Customers  
      SET IsVIP = 'TRUE',  
          LastModified = SYSDATE  
      WHERE CustomerID = cust.CustomerID;  
    END IF;  
  END LOOP;
```

```
    COMMIT;
END;
/
```

Scenario 3: Reminders for loans due in 30 days

```
BEGIN
  FOR loan IN (
    SELECT CustomerID, DueDate
    FROM Loans
    WHERE DueDate BETWEEN SYSDATE AND SYSDATE + 30
  ) LOOP
    DBMS_OUTPUT.PUT_LINE(
      'Reminder: Customer ' || loan.CustomerID ||
      ' has a loan due on ' || TO_CHAR(loan.DueDate, 'DD-MON-YYYY')
    );
  END LOOP;
END;
/
```
